TO-DAY'S STOCK MARKETS STATE ST. NEWS FOR INVESTORS WEAKNESS IN COPPER LIST

Stocks seem to rally when the market gets out, advancing with a good deal of confidence and strength for the time, but becoming very weak when the large professional bear accounts has covered. This indicates an entire absence of public interest.

Money is likely to exercise a more potent influence over the market than it has for some time than at any time since the crisis of 1907.

Advances of odd money rates last week to 2 per cent, raises another question of extreme importance that would not be presented but for the possibility of the Republicans losing control of Congress. It would be the addition of money that would make the situation more serious. The importance will be on the side of the Republicans, who are in a condition of doubt. This is not a pleasant thing to look forward to, even though it is two years in the future.

Freight rates have become the paramount issue in the stock market. Practically all of the railroads have filed notices that they intend to raise a decrease of five cents a ton, which will average about 18 per cent in the Western States. At the same time it became known sufficiently that the Interstate Commerce Commission is about to take action on the filing of the largest railroad in the country.

It is possible that the commission may change their mind, but the trading public are greatly disturbed. The first indication that there is a decrease in freight rates is a very serious one. Many of the railroads have already filed notices of decrease, and the commission is about to take action on the filing of the largest railroad in the country.

The railroad interests, while admitting the existence of the situation, are not so much disturbed. They are not so much disturbed as the trading public are. They are not so much disturbed as the trading public are. They are not so much disturbed as the trading public are.

Heavy flows of cash are being put into the market. It may be that the market will rally, but the market will rally. It may be that the market will rally, but the market will rally.

It is a sound business proposition that the industrial companies will follow the lead of the railroad companies. They will follow the lead of the railroad companies. They will follow the lead of the railroad companies.

There is no indication among investors to pay more attention to the industrial than to the railroad companies. They are not so much disturbed as the trading public are. They are not so much disturbed as the trading public are.

The recently organized Pullman Trust Company opened its new banking house at No. 50 Washington street. It will make a special effort to cater to the real estate and insurance interests of the city. The president is Charles L. Merrill, formerly of the Pullman Trust Company.

The Boston & Maine has ordered from the American Locomotive Company four twenty-ton steam locomotives. They will be used for the Boston & Maine. They will be used for the Boston & Maine.

All plans of the American Locomotive Company are being carried out. They will be used for the Boston & Maine. They will be used for the Boston & Maine.

The funeral of Mrs. Agnes Connolly of Dorchester took place at 10 o'clock today at St. Peter's Church in Dorchester. The solemn high mass of requiem was sung by the Rev. Florence Halton, pastor of the Rev. Edward Kenney and the Rev. Michael Butler. The pallbearers were John Vailley, James Walford, Patrick Walford, James Connolly, Thomas Connolly and George Connolly.

After a first opening the local market fell off in sympathy with New York. Copper had upon the outside, though the volume of trading was small. Many steep selling orders were in evidence, but at the same time there were many orders for buying orders from important interests indicating quiet absorption on the decline.

The buying rates indicated a large short interest, however, was widely spread throughout the list, indicating no concentrated pressure.

In the miscellaneous and railroad lists practically no trading was done and quite a few very small odd lots, coming mostly from small investors.

NEW YORK STOCKS.

Following is the range of prices to noon for leading New York stocks:

HENRY, PICK ME SOME OF THOSE FLOWERS.

IT'S AGAINST THE LAW, LOVE!

WHAT OF IT? AREN'T YOU A TAX PAYER?

YES, BUT—

WELL, THEN GO AND PICK 'EM! — YOUR MONEY PAID FOR THEM!

YES, LOVE.

HEY, YOU! — WHAT YOU DOIN' THERE?

MY WIFE WANTED SOME FLOWERS. THE IDEA

DON'T YOU DARE LAY HANDS ON MY HUSBAND, — YOU BIG BULLY!

YES, LOVE

YOU JUST PICK ALL THE FLOWERS YOU WANT, HENRY!

YES, LOVE

Jeffery

Our country! In her intercourse with foreign nations, may she always be in the right; but our country, right or wrong.

—Stephen Decatur.

Little Bobbie He Writes About
A Book His Ma Read
By WILLIAM F. KIRK

[illegible]

President Wilson said that he had determined to spend his life in the democratizing of the university; that the endowed universities of America look for the support of the wealthy and neglect their opportunities to serve the people, and that the type of university man that we are mainly producing is a patron of privilege and "won't go."

Incidentally the speaker admitted that the State universities are more democratic than those that depend upon endowments and the patronage of rich men.

Panel 1: A woman in a dress and hat walks past a man in a suit who is looking at her.

Panel 2: A large, portly man in a chef's hat and apron stands next to a man in a suit who is holding a small object.

Panel 3: The portly man is shouting at the man in the suit, who is holding a small object.

Panel 4: The portly man is shouting at the man in the suit, who is holding a small object.

[illegible]

The truth is—and Mr. Wilson does well to emphasize it, even at the risk of chilling the Pittsburgers and the pedants—that the real humanities and sciences are in their very nature democratic and universal. And a culture conceived in the interest of monopoly is a mere conceit—devoid of all artistic and scientific validity.

Happily there are multitudes of men and women in America, of more or less schooling, who understand Mr. Wilson's gospel of democracy quite as well as he does—who understand that learning must be democratic in order to be sane.
